

LOGO SILT FENCE

Custom Printing Available!
Silt Fence can be printed with customer name, logo, and phone number

Ferguson offers custom logo printing specific to the customers' requirements. Any style silt fence we carry can be printed with details such as customer name, logo, and phone number.

Silt fence controls sediment runoff from construction sites during active construction. Silt fence slows water long enough to cause sediment to drop out, allowing water to pass through the fabric.

Silt fence is made of a woven polypropylene material and is nonbiodegradable. This engineered geotextile is stabilized to resist degradation due to ultraviolet exposure. It is resistant to commonly encountered soil chemicals, mildew, and insects. Polypropylene is stable within a pH range of 2 to 13, making it one of the most stable polymers available for geotextiles today.
